

## **Light a fire in the open.**

Hot, dry, and windy weather can turn a small fire into a big fire very quickly.

To reduce the risk of fire, you cannot light a fire in the open when there is a TOBAN.

# **Work with grinders, welders, or other tools that create spark.**

Working with grinders, welders, or other tools that create spark can cause a fire, especially when the weather is hot, dry, and windy.

To reduce the risk of fire, you cannot use these tools when there is a TOBAN.

# **Use a BBQ that burns woods, charcoal, or heat beads.**

Using a BBQ that burns wood, charcoal, or heat beads may cause a fire when the weather is hot, dry, and windy.

To reduce the risk of fire, these BBQs cannot be used when there is a TOBAN.
